

Military COTS Power Products key customers include:

COTS Rectifier, Converter & Inverter Power Modules

COTS Configured Power System

## COTS Power Products Features:

- Conformal Coat
- HASS and HALT tested
- Parts Derating per Mil guidelines
- Environmentally Hardened
- Widened operating temperature range

## **Our Mission:**

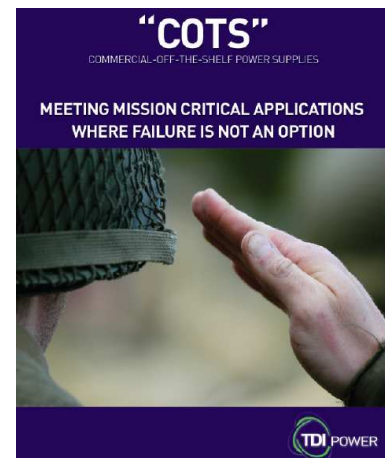

To be the premier supplier of COTS electronic power conversion equipment for military applications by providing innovative solutions, best in class reliability and value.

## **What we do:**

Our core competency is our ability to match power conversion products to demanding customer and industry standards and deliver a highly reliable product that meets market driven cost targets. TDI presents the designers of military systems the opportunity to reduce costs and development time with Commercial-Off-The-Shelf (COTS) products that can withstand the rigors of their system design requirements. Along with reduced design and manufacturing cost, other benefits include shorter lead times and enhanced performance that comes from using mature and proven commercial technologies combined with the implementation of reliability Best Practices.

Solutions compliant to military standards including:

- MIL-STD-461D
- MIL-STD-810F
- MIL-STD-1275
- MIL-STD-704
- DEF STANS as applicable
