Subject: TDI Introduces Dynamic 1U Power Center

Hackettstown, N.J. – May 19, 2008

TDI Power is proud to introduce their ultra-compact 1U Power Center providing reliable -54 Volt power, rated up to 1,000 watts all within one rack unit. Two hot-pluggable 500 watt rectifiers convert 90-276 Volts AC into DC, which is distributed through up to ten GMT fuses. A connection to an external battery has an optional circuit breaker and Low Voltage Disconnect for optimizing safety and performance. The power center is monitored & controlled with TDI's eLink75 Ethernet controller.

Designed for use with remote, outdoor cabinets, the 1U Power Center helps manage site performance by providing power and signals for flush fans, door alarms and other environmental controls. For additional network awareness, an auxiliary 12 Volt DC output can be used to operate an Ethernet switch with battery backup.

DEMANDING APPLICATIONS DEMAND TDI POWER

Additional features include:

- N +1 Redundancy
- Input: 90 - 276 VAC, 47 – 63 Hz
- Output: -54 VDC, Adjustable
- Battery Breaker and LVD
- Ruggedized assemblies with full conformal coating
- Agency Compliance: UL60950, IEC60950

Transistor Devices, Inc. (TDI) is a global supplier of Power Systems Solutions for the Computer/Networking, Telecommunications, Military/Aerospace, Medical and Industrial markets. We have the broadest range of high technology power conversion products available in the marketplace, including DC and AC Power Systems, Power Supplies, Rectifiers, Converters and accessory equipment. Established in 1960, TDI is headquartered in New Jersey, has over 1000 employees and four facilities located throughout the world. For more information about TDI go to www.tdipower.com.
